This deeply rich, ultra-restorative crème powerfully fortifies skin with long lasting hydration while delivering a luminous, sculpted and firmed appearance. The clinically proven retinol-alternative Bakuchiol pairs with four layers of hyaluronic acid along with anti-wrinkle peptides to stimulate collagen production and restore a youthful glow to the skin.

Micropigmentologist

Permanent cosmetics, also known as permanent makeup, is a cosmetic technique where pigments are implanted into the skin to enhance facial features. It can be used for eyebrow shaping, eyeliner, lip color, and other enhancements that mimic the look of conventional makeup.

With over **20 years of experience**, **Lisa Chism, RN** is highly skilled in providing these services, ensuring natural-looking, long-lasting results tailored to each client's individual needs.
